PROFILE

Computer Science student with practical experience in databases (SQL, PostgreSQL, MongoDB), data analysis with Python, and database-driven applications. Basic knowledge of SAP ABAP and SAP BTP/ABAP Environment, with a strong interest in enterprise application development and integration. Reliable, proactive and independent working style, with strong communication skills in German (C1) and good English proficiency. Completed the first five semesters within four semesters.

PROFESSIONAL EXPERIENCE

Intern – Data Analysis & AI | II-THM, Giessen 03/2026 – 06/2026

- Prepared and structured data (JSON, MongoDB, Qdrant) as a foundation for a locally hosted AI system
- Analyzed and evaluated the output quality of locally hosted large language models

Technologies: Python, Node-RED, MongoDB, Qdrant, JSON, Ollama

Web Developer | SisterSchola Clinic, Darmstadt 02/2025 – 03/2026

- Developed a database-driven web application using SQL and Supabase and configured email services via SMTP
- Performed software testing and debugging

Technologies: SQL, Supabase, JavaScript, HTML, CSS, Git

PROJECTS

Crosslingual RAG Research | Bachelor's / Research Project 07/2026 – 10/2026

- Analyzed and evaluated extensive datasets covering retrieval and answer quality and visualized the results

Technologies: Python, NumPy, Pandas, Matplotlib, Qdrant, BGE-M3, DeepEval, Ollama

AI Mail Manager | Full-Stack & AI Project 08/2026 – 09/2026

- Analyzed and prioritized incoming emails using a Human-in-the-Loop workflow; integrated the Gmail API using OAuth 2.0

Technologies: Java 21, Spring Boot 3, React, TypeScript, Gmail API, Google Gemini, REST API

Enterprise Ticket Management System | Personal Full-Stack Project 03/2026 – 04/2026

- Developed a web-based system for recording, managing and tracking support requests with role-based user management, REST API and an AI-powered chatbot

Technologies: Java 21, Spring Boot 3, Spring Security, React 18, Tailwind CSS, PostgreSQL

SAP ABAP & BTP Fundamentals | Self-Study / Practical Project 09/2026 – Present

- Built foundational knowledge of SAP ABAP and worked with the SAP BTP ABAP Environment
- Gained practical experience with ABAP data models, database tables and database-driven applications

Technologies: SAP BTP, ABAP Environment, ABAP, SQL

EDUCATION

Bachelor of Science in Computer Science | Technische Hochschule Mittelhessen, Giessen 04/2024 – Present

Focus areas: Software Development, Databases, IT Systems and Web Technologies. Currently in the 5th semester.

Scientific High School Diploma | Focus on Mathematics and Computer Science 09/2019 – 06/2022

TECHNICAL SKILLS

SAP:	ABAP (Basic Knowledge), SAP BTP, ABAP Environment
Databases:	SQL, PostgreSQL, MySQL, MariaDB, Supabase, MongoDB, Qdrant
Data Analysis:	Python, Pandas, NumPy, Matplotlib, JSON, XML
Interfaces:	REST APIs, OAuth 2.0, SMTP, MQTT, HTTP
Programming:	Java, Python, ABAP, C, JavaScript, TypeScript
Web & Tools:	HTML, CSS, React, Node.js, Tailwind, Git, Docker, Node-RED, Linux, Windows
AI:	LLMs, RAG, Agentic AI, Ollama, BGE-M3, DeepEval

LANGUAGES

German: C1 (telc Hochschule, Goethe-Institut) | **English:** B2 | **French:** Native
